# **EXPERIENCE**

## **Dor Technologies**

Lead Systems Architect San Francisco | 2015 - Now

#### CareerLabs

Technical Cofounder San Francisco | 2015 - 2016

# Mark One / MyVessyl

Software Engineer San Francisco | 2014 – 2015

### Apple

Software Engineering Co-op Cupertino | 2013 - 2014

### InstallNet IT Solutions

Annapolis, MD | 2011 - 2012

# SKILLS

**Machine Learning** 

**Software Engineering** 

- Founding engineer, responsible for the a large portion of the design and implementation of the machine learning and software systems that power Dor.
- Shipped a battery powered, neural net driven, IoT device that tracks customer foot traffic.
- Lead the design and implementation of the automated data pipeline that allowed a tiny team of engineers to process millions of events and improve thousands of edge machine learning devices.
- Built a fullstack application that gathers data from thousands of foot traffic sensors in order to power the Dor analytics platform and provide actionable insight for Dor's customers.
- Lead CareerLabs' team of engineers to build a scalable and job search and employer rating platform. Launched <a href="https://careerlabs.com">https://careerlabs.com</a> in 2015 (Closed 2017)
- Designed and built the backend infrastructure that supported an Al driven consumer hardware device.
- Developed simulator tool in Objective C in order to improve the scalability of an OSX Server Application.
- Created fullstack web application in NodeJS / AngularJS that processes hundreds of thousand of tickets in order to produce actionable insights.

Python, Numpy, Pandas, Tensorflow, Keras, C

Docker, AWS, SQL, NoSQL, Python, NodeJS, Whatever gets the job done
